Summary

Enthusiastic Fullstack Developer with a strong foundation in modern web and mobile development. Recently completed the Mobile Application Design & Development program at Algonquin College, with hands-on experience in building responsive, user-friendly interfaces using React, React Native, and Next.js. Passionate about creating intuitive digital experiences and continuously learning new technologies.

Education

Algonquin College, Ottawa Ontario   Expected June 19th, 2025

College Diploma, Mobile Applications Design & Development

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL
Front-End: React, Next.js, React Native, Redux, Tailwind CSS, Material UI
Back-End: Node.js, Express
Databases: PostgreSQL, MongoDB
Developer Tools: Git, GitHub, Postman, Jest, Docker
Design: Figma, Illustrator
Currently Learning: ThreeJs

Soft Skills

In my current job as a Cashier at Canadian Tire, I've gained valuable problem-solving skills, excellent written and verbal communication, and strong organizational skills. Very team and detail oriented and can handle pressure well.

Experience

During my time at Algonquin College, I have gained essential skills in frontend and backend technologies. The Mobile Application Design & Development program focused on designing and developing responsive web and mobile applications, building RESTful APIs using Node.js and Express, integrating databases such as MongoDB, collaborating in agile teams to plan, design and develop full-stack applications, applying UI/UX principles using tools like Figma and Illustrator, testing with postman and jest, and practicing version control and teamwork using Git and GitHub. My Portfolio and GitHub profile are linked above to showcase some of my skills.

Career Goals

I am seeking an internship or entry-level position where I can grow as a Frontend Developer while applying my skills in backend technologies. I aim to contribute to a collaborative development team where I can help build accessible, scalable, and visually engaging applications. My goal is to continuously expand my knowledge of modern frameworks and tools, and eventually grow into a fullstack role with a strong frontend focus.
